

nanostructures

surfaces and thin films

nano-optics

nano-photonics

nanoelectronics

spintronics

16th IUUSTA International Summer School on Physics at Nanoscale

June 12–17 2017

Devět Skal, Czech Republic

- David Cahen (Weizmann Institute, Israel): *Bio-molecular Electronics and Photovoltaics*
- Olindo Isabella (TU Delft, The Netherlands): *Nanophotonic Structures*
- Lars Korte (Helmholtz Zentrum Berlin, Germany): *Perovskites and Silicon in Solar Cells*
- Olivier J. F. Martin (EPFL, Switzerland): *Nanophotonics and Optical Signal Processing*
- Thomas Michely (Köln University, Germany): *2D Materials*
- Gareth Parkinson (TU Vienna, Austria): *Single Molecule Catalysis*
- Erik Reimhult (BOKU Wien, Austria): *Bio-nanotechnology*
- Pere Roca i Cabarrocas (Ecole Polytechnique, ParisTech, France): *Physics of Interfaces and Thin Films*
- Paul S. Weiss (UCLA, USA): *Atomic-Scale Measurements and Control in Chemistry, Electronics, and Biology*
- Roland Wiesendanger (Hamburg University, Germany): *Magnetism at Microscopic Level*

and the others...

<http://physics.fme.vutbr.cz/ISS2017.html>

On behalf of organizing committee T. Šikola (Brno University of Technology, CZ), A. Fejfar (Academy of Sciences, Prague, CZ)

Programme committee H. H. Brongersma (Calipso, Eindhoven, NL), A. Fejfar (Academy of Sciences, Prague, CZ), I. Kamiya (Toyota Technological Institute, Nagoya, JP)
T. Šikola (Brno University of Technology, CZ), C. Teichert (University of Leoben, A), P. Varga (Technical University Wien, A)
